Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/526,754	Applicant(s) FITZPATRICK ET AL.	
	Examiner Ryan Severson	Art Unit 3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 December 2007.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-13, 20, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Howard, III et al. (6,096,048).** Howard reference discloses the device substantially as claimed including a frame having first and second arms (9) having a plurality of marker attachment points (19 and 45). A plurality of markers (21) can be attached to the marker points in various orientations. Since the bores of the attachment points are threaded, the markers are *capable* of being screwed into the bores from either side of the arm, thereby creating different orientations. A maxillary holding device (see figure 4) is also included that is secured to the jaw of a patient. The holding device is removable from the frame. The frame is preferably made from a polymer material (see column 6, lines 18 and 19).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howard, III et al. (6,096,048) in view of Galloway, Jr. et al. (2003/0000535).

Howard reference discloses the structure substantially as claimed as has been described above. However, Howard reference does not disclose a reference emitter used with the device. Attention is drawn to Galloway reference, which teaches the use of a reference emitter in image-guided surgery to allow a person's anatomy to move relative to a tracking sensor without losing accuracy during the surgical procedure (see paragraphs 40 and 44). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the reference emitter of Galloway reference with the device of Howard reference to maintain accuracy during an image-guided surgical procedure if the patient moves relative to the tracking sensor.

Response to Arguments

5. Applicant's arguments filed 19 December 2007, with respect to the rejection(s) of claim(s) 14 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Galloway reference.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan Severson whose telephone number is (571)272-3142. The examiner can normally be reached on Monday - Friday 8:30-5:00.
